Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 2 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  Exercision of time may be available under the provision of 37 CPH 13/03, into event, however, may a legiply be timely flad.  1 INC period for regy is specified above, the maximum statutory priests will apply and well expire SIX (8) MONTHS from the maining date of this communication. Plant or control period for expression will be supposed and supply and well expire SIX (8) MONTHS from the maining date of this communication. Plant or control period for express will be period to this communication, even if simply fled, may reduce any searce of patients and accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.  Status  1) Responsive to communication (s) filed on 28 January 2011.  2a) This action is FINAL.  2b) This action is non-final.  3 Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.  Disposition of Claims  4 Claim(s) 10-20 is/are pending in the application.  4a) Of the above claim(s) 15-18 is/are withdrawn from consideration.  5 Claim(s) 19 and 20 is/are allowed.  6 Claim(s) 19 and 20 is/are allowed.  6 Claim(s) 12 is/are objected to.  8 Claim(s) 12 is/are objected to by the Examiner.  10 The geoficiation is objected to by the Examiner.  10 The proper are subject to restriction and/or election requirement.  Application Papers  9 The proper are subject to restriction and/or election requirement.  Application Papers  9 Application Papers  9 Application Papers  9 Application is objected to by the Examiner.  10 Application Papers  9 Application is objected to by the Examiner.  10 Application Papers  9 Application from the international Bureau (PCT Rule 17.2(a)).  11 Acknowledgment is made of a claim for foreign priority documents have been received in Application No.  2 Certified copies		Application No.	Applicant(s)

## **DETAILED ACTION**

## Reopening of Prosecution After Appeal Brief

1. In view of the Appeal Brief filed on 1/28/2011, PROSECUTION IS HEREBY

REOPENED. A new ground of rejection is set forth below.

2. To avoid abandonment of the application, appellant must exercise one of the following

two options:

(A) File a reply under 37 CFR 1.111; or

(B) Initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by

an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief

fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have

been increased since they were previously paid, then appellant must pay the difference between

the increased fees and the amount previously paid.

3. A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing

below:

## Status of the Claims

4. Claims 10-20, filed 6/29/2009, are currently pending. Claims 15-18 remain withdrawn.

Accordingly, claims 10-14 and 19-20 are the subject of this Office Action.

## Response to Arguments

5. Applicant's arguments, filed 1/28/2011, have been fully considered. Rejections and/or

objections not reiterated from previous office actions are hereby withdrawn. In particular, the

rejection of claims 10-14 and 19-20 under 35 U.S.C. 103(a) has been withdrawn in view of

Applicant's arguments. It is considered persuasive that the skilled artisan would not have

Application/Control Number: 10/587,637 Page 3

Art Unit: 1628

selected a non-specific D2L/D3 dopamine receptor agonist for modification (i.e., the skilled

artisan would have selected a compound which exhibits selectivity for the D3 receptor).

6. The following rejections and/or objections are either reiterated or newly applied. They

constitute the complete set presently being applied to the instant application. Arguments directed

to withdrawn rejections are hereby rendered moot.

Allowable Subject Matter

7. Claims 19-20 are allowable for the reasons discussed above. Namely, the claimed

compounds have been searched and are deemed free of the prior art. Furthermore, it would not

have been obvious to selected the closest structurally related compound(s) taught by the prior art

for modification since the closest structurally related compound(s) are disclosed as non-specific

D2L/D3 dopamine receptor agonists and, furthermore, the prior art teach the desire to find

compounds which exhibit selectivity for the D3 receptor. As such, a person of ordinary skill in

the art would not have selected a non-specific D2L/D3 dopamine receptor agonist for

modification to arrive at the instantly claimed compounds.

8. Since the compounds of claims 19-20 are considered enabled and possess written

support, the claims are allowed.

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the

basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Application/Control Number: 10/587,637

Art Unit: 1628

10. Claims 10-11 and 13-14 are rejected under 35 U.S.C. 102(b) as being anticipated by *Swart et al* (J Analyt Toxicol 18:71-77, 1994 – cited in a previous Action) as evidenced by *Beane* (Advance Lubrication Techniques – available online at <a href="http://contrails.iit.edu">http://contrails.iit.edu</a>).

Page 4

- 11. Instant claim 10 is drawn to a pharmaceutical composition comprising (S)-2-N-propylamino-5-hydroxytetralin (claim 11, more specifically, as a pure (S)-enantiomer as recited by claim 14) or a pharmaceutically acceptable salt or prodrug thereof (wherein said prodrug is a compound as defined by claim 10), and at least one pharmaceutically acceptable carrier or adjuvant selected from the group consisting of lubricants, for example. As summarized, the invention reads on claims 10-11 and 14.
- 12. As discussed in a previous Action mailed on 10/16/2008, and reiterated largely as follows, Applicant acknowledges that *Swart et al* (J Analyt Toxicol 18:71-77, 1994) "disclose the (S)-enantiomer of 2-N-propylamino-5-hydroxytetralin" (Applicant's Specification, Page 2, Paragraph 0012). Specifically, *Swart et al* identified the compound as a metabolite of S(-)-2-*N*-propyl-*N*-2-thienylethylamino-5-hydroxytetralin (N-0923) using HPLC with UV detection, combined with atmospheric pressure ionization mass spectrometry (entire document and Page 74, Figure 2, Metabolite 4). More specifically, in being subjected to LC/MS (as evidenced by Page 75, Figure 4), *Swart et al* disclose that the compound was exposed to **nitrogen gas** (Page 74, section entitled 'D. Mass spectrometric analysis').
- 13. As evidenced by *Beane*, nitrogen gas is a lubricant (Page 384, Second Paragraph, "using nitrogen gas as the lubricant").

Application/Control Number: 10/587,637

Art Unit: 1628

Page 5

14. As such, the solution encompasses a "pharmaceutical composition comprising (S)-2-N-propylamino-5-hydroxytetralin... and at least one pharmaceutically acceptable carrier or

adjuvant" selected from the group consisting of lubricants, for example.

15. Accordingly, instant claims 10-11 and 14 are anticipated.

16. Instant claim 13 is drawn to the composition of claim 10 that is adapted for transdermal,

transmucosal or parenteral administration. Applicant is advised that use limitations (i.e., adapted

for transdermal, transmucosal or parenteral administration) within product claims do not carry

patentable weight unless the recitation of the intended use of the claimed invention results in a

structural difference between the claimed invention and the prior art in order to patentably

distinguish the claimed invention from the prior art. If the prior art structure is capable of

performing the intended use, then it meets the claim. In the instant case, absent evidence to the

contrary, it is asserted that the prior art composition can be adapated for transdermal,

transmucosal or parenteral administration.

17. Accordingly, instant claim 13 is also rejected.

Claim Objections

18. Claim 12 is objected to as depending from a rejected base claim.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to CRAIG RICCI whose telephone number is (571) 270-5864. The

examiner can normally be reached on Monday through Thursday, and every other Friday, 7:30

am - 5:00 pm.

Application/Control Number: 10/587,637

Art Unit: 1628

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

Page 6

supervisor, Brandon Fetterolf can be reached on (571) 272-2919. The fax phone number for the

organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would

like assistance from a USPTO Customer Service Representative or access to the automated

information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
